Experience

Oktober 2022 – Present ⬤ Tangerang Selatan

TIK Programmer
Universitas Pembangunan Jaya

I am currently working at Pembangun Jaya University as a Full-Stack Developer, my responsibilities include building new systems as needed, as well as developing and maintaining various features for existing applications.

Februari 2020 – Juni 2022 ⬤ Tangerang Selatan

Full-Stack Developer
PT. Alona Indonesia Raya

I have been working at this company for over 2 years as a Full-Stack Developer. My responsibilities include Backend, Frontend, DevOps, and Database Administration. I have also served as the Team Lead on one of our application projects. This project was a landing page builder system that can integrate and connect with external domains. The system is also integrated with Google Analytics, Google Ads, Facebook Ads, and TikTok Ads. It offers a 1-month trial and users can choose to subscribe. The payment system uses one of the payment gateways, Midtrans.

May 2019 – Juli 2019 ⬤ Jakarta Timur

Backend Developer
PT. Inovasi Dinamika Solusi

I work at this company as a Backend Developer, responsible for developing RESTful APIs and for the development and maintenance of various features for existing applications.
